DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

The independent claim 1 would be more clear if after the last line "whereby the sensor is tested by releasing gas from the gas device".

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

2. Claims 1 – 8 are allowed, as they appear to be novel subject matter over the prior art. The prior art that use the gas reservoir for testing purpose of gas sensor fails to describe or suggest the use of a step motor wherein a sleeve mounted on the step motor; a drive rod mounted on a periphery of the sleeve to rotate therewith; a link which driven by the drive rod with a hook portion hooked on the nozzle of the gas reservoir.

All other claims are dependent on claim 1 and are therefore novel as well because of that dependency.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Koch (U.S. Publication 2004/0035179) "Gas or Heat Detector....".
- b. Consadori et al. (U.S. Patent 5,526,280) "Method and system...".
